

ENACT FOR THE FUTURE

We invite you to join us in a networking event to regenerate the long-term health and sustainability of Canberra. We are hosting an inaugural gathering on **Tuesday, 11 NOVEMBER 2008** to support existing initiatives and to create ways of taking action in our community.

Do you have a passionate commitment to sustainability in Canberra?

Attend this event to accelerate innovation and change in the region, and to explore how to best collaborate in dealing with Canberra's carbon footprint and climate change issues. Learn how to take practical steps to turn our ideas for Canberra into tangible actions. Build a team to plan and enact future networking and knowledge-sharing events.

Tomorrow's world is not only about finding solutions to today's problems, but about inventing strategies that are so inspiring, powerful and efficient that they bring us to new places: where yesterday's limitations are no longer relevant.

Come and join us in the creation of a healthy, sustainable future for Canberra!
