

# ENACT FOR THE FUTURE 2

We are hosting our second  
gathering on **Wednesday**  
**18 MARCH 2009.**

How can we find new levels of  
working together for  
sustainability in the ACT?

How can we lighten the load?

If you have a passionate commitment to sustainability in Canberra, come and explore how to collaborate in dealing with Canberra's carbon footprint and climate change issues.

Our event guest, Emeritus Professor Valerie A Brown AO, is a Visiting Fellow at ANU's Fenner School of Environment and Society and is a wise elder — both internationally and locally — in engaging local communities in collective social learning processes to create change.

At this evening's event, you will discover and develop social learning models to create relevant, results-driven actions. With these models, you'll leave with tools and skills for engaging people and to enable them to enact the changes that they aspire to make.

*Creating a healthy, just, sustainable future for Canberra!*
