

# AWAKENING THE DREAMER, CHANGING THE DREAM

## SYMPOSIUM

**We invite you to explore a new global and local vision built on sustainability, spiritual fulfillment and social justice.**

Be the difference that you want to see by sharing with like-minded individuals as we learn meaningful new ways of being, doing and co-creating the future.

### WHAT'S IT ALL ABOUT?

This symposium is for people who care about what's happening in the world, our community and families. The symposium will...

- Reconnect you deeply with the scope, complexity and urgency of the issues facing our fragile planet
- Challenge our inherited worldview and its role in bringing us to where we are today – freeing us from our current assumptions, thinking and behaviour
- Invite you to view the future not as inevitable, but rather as 'creatable' – and to experience how you make a difference in how the future of the planet unfolds
- Encourage you to be an integral member of an ever-expanding network of global citizens committed to sustainability, social justice and spiritual fulfillment
- Define a vital role for yourself which inspires you into action, and to motivate you in expressing and fulfilling that role.

Led by trained volunteer facilitators, this participatory symposium applies experiential exercises in order to position participants powerfully in a place of possibility, creativity, community, and action.

As part of the agenda, we will examine and analyse our biggest challenges and opportunities today:

- ➔ The state of our industrial world and the thinking that got us to where we are
- ➔ A new dream: new ideas about what really matters – leading to deep connections and surprising solutions
- ➔ How you can be part of what is emerging – because you already are!

Combining video segments, guided group interactions, quiet self-reflection and shared feelings and ideas, you will gain rich insights that generate hope, inspiration, purpose and a commitment to individual and collective action.

**We aren't going to tell you what specific steps you should take. What we will do is leave you informed and empowered to make your own choices about how you'll respond and what actions are yours to take.**

### SUSTAINABILITY MARKETPLACE

As part of the symposium, individuals and groups will be invited to share their projects and actions in their area of passion and expertise.

**We are hosting our third gathering at 12:00pm Saturday 15 August 2009**

enACT for the Future aims to increase participation in, and co-ordinated action between, sustainability initiatives for a healthy, creative, sustainable future in the ACT and region

The symposium is inspired by indigenous people of the Amazon rainforest, The Pachamama Alliance, recently labeled 'the most important single NGO in the world right now' by Paul Hawken, author of *Blessed unrest*
